Ques 1: Create a container for the below bash script(**prime.sh**).
1. Create a Dockerfile
2. Create a Docker Image

Find the script from here https://github.com/DARK-art108/Bash-Scripts

Solution:

Dockerfile:

```
FROM alpine
RUN apk add --no-cache --upgrade bash
COPY Prime.sh  /Prime.sh
RUN chmod +x /Prime.sh
ENTRYPOINT ["sh", "/Prime.sh"]
CMD [ "5" ]
```

Commands:

```
Docker build -t prime . // To create image
Docker run –name prime prime //To create conatiner
```
